

ELLIOTT-AUTOMATION IN AVIATION

Wolfe named **Young Exporter** Bank Recognises ADD Achievement

BRIAN WOLFE, manager of ADD, was up to his neck in publicity on May 14 when he was formally pre-sented with the winning award in the National Provincial Bank's Young Exporter of the Year com-petition. Although much of the press coverage was lost during the next day's newspaper strike, interviews with Brian were broadcast by the BBC home and overseas services, and reports appeared in the London evening papers and the local Kent newspapers. Brian entered the competition last year and was named the winner for his part in gaining the order for head-up displays for the AZ action of the service of the service of the the AZ action of the service of the

the A-7 aircraft, because it represented a major breakthrough into the difficult American electronics market. There were ten runners-up, who also received their awards in a formal ceremony and press conference held at the National Provincial Bank's head uarters in the City.

Brian says he fully appreciates that the order was won by teamwork. The Bank's recognition of EFA's pioneering work in selling to the USA is another factor in establishing our reputation and strength in this very difficult market.

Passenger-Carrying Automatic Landings

Capt Jimmy Andrew made the first passenger-carrying VC10. He will also be the first Concorde captain.

SPORTS INTER-DIVISIONAL

Overcast skies and light rain did not stop Elliott Athletes from performing well at the Inter-Divisional Sports meeting held at Elliott Sports Ground in Featherby

awarded to the athlete obtaining the highest number of points, was

closely contested and shared by E C. Wilkins (MACD) and L. Martin (TACD), with a total of 19 points. Ted Wilkins is pictured below right winning the 440yds., with Len Murphy (Dartford) second, and L.

Martin (TACD) third. Ted also ran a well timed race in the one mile handicap. The only scratch starter, he quickly ran through the field to take the lead during the last lap and finish a comfortable first. Len Martin (TACD), the other winner of the Victor Ludorum Trophy, is pictured below left crossing the finishing line for TACD in the 4×110 yds. relay. AEID were second in this event, and Dartford third. Len also won the Long Jump with a leap of 19ft. More pictures on page three

A on automatic landing was reached on the morning of

July 1968

May 15 when Super VC10 G-ASGK, flying the scheduled BOAC service from Chicago and Montreal landed automatically at London Airport with 146 passengers. Captain of the aircraft and supervising the operation was BOAC's Flight Development Manager Capt. Jimmy Andrew, who is to be BOAC's first Concorde captain. He told the passengers about it afterwards.

Gaining Experience

The landing was, of course, made in clear weather because BOAC must build up experience with the system, and familiarise their Super VC10 crews before moving on into bad-visibility operations. Two aircraft already have the additional units for automatic landing; the whole fleet will be fitted by 1970 at a cost, say BOAC, of £2m. Sometime next year, BOAC intend to be making use of the system for automatic landings in Category 2 weather (when forward visibility is only 1,200ft. and the ceiling is 100ft.) and to be progressing towards its Cate-gory 3 operational capability, when the pilot cannot see enough to land the aircraft himself.

In Thick Fog

TACD have been working with British Aircraft Corporation and BOAC for the past year and many hundreds of demonstration automatic landings were made at several airports in order to obtain the final official approvals. During February, the trials aircraft made eight automatic landings in thick fog at RAE Bedford and an and the second s in the more extreme Category 3B conditions for which it is ultimately intended.

BOAC's achievement of the first passenger-carrying automatic landing came the day before an important EFA sales presentation in the USA. The news was a convenient and con vincing addition to our sales arguments

Engineering Strike Denser than usual traffic jams and energetic pickets greeted many Elliott and Thorn em-ployees on May 15 when the engineering unions held their one-day strike in support of the national wage claim. The strike effectively brought

Elliott production to a standstill, as happened throughout

the country.

The

National

Road, Gillingham on June 8. The Victor Ludorum Trophy,

Miss Mutton, head of the mailing department, standing at the rear, watches the morning mail sorting by Mrs Joan Ellis, Mrs Iris Thirlwell, Mrs May Parker, Mrs Vicky Kane, Miss Maureen Rose and Mrs Betty Clarke. In the background is Mrs Pam Adams. (Picture by David Meredith.)

LETTERS BY THE THOUSAND Long Service Team Handles Elliott Mail

EVERY work-day morning at 7.30 the early birds of the mailing department begin sorting anything from eight to 15 bags full of incoming mail for distribution throughout the establishment. Every letter is opened, recorded where necessary and its proper recipient identified. Sorted letters are then placed in a compartment ready for collection by the various divisions. About 1,000 letters require an hour's work, plus an encyclopaedic knowledge of the company, before they can be directed to the right compartment.

turn their attention to duplicating. A second post is sorted later in the day. Typing stencils and duplicating is a major activity, in which all the staff take a hand.

By early afternoon, the outgoing mail By early atternoon, the outgoing mail is collecting and has to be franked or stamped and prepared for delivery by van to the main GPO sorting office in Chatham by 5.00. By 4.30 it's "all systems go" to get the mail away—and

late contributions are unpopular. The mailing department team of seven is led by Miss Mutton, who was appointed to the department nearly 20 years ago, when Elliotts employed only a few hundred people at Roch-ester. Now she has a team of seven ladies, all of whom have also been with the company for many years. Their combined experience is essential in identifying the correct departments for the vast variety of letters, docu-ments, invoices and orders addressed

By 8.30 the first letters are on their way In addition, Miss Mutton is inform-to the towers and some of the team ation officer responsible for sorting ation officer responsible for softing out a steady stream of telephone enquiries about the company. The department has achieved with the Ministry of Technology the reputa-tion of being most efficient in replying to these softing to these enquiries.

The picture above shows Miss Mutton and her ladies at work on a typical morning mail, in the sorting om at the airfield corner of the main

THE CHIMNEY ISN'T YELLOW!

MACD Engineering complained that EFA news had misled them by forecasting that one of the metal chimneys on the main factory would be painted yellow in the redecoration scheme. In fact, one chimney now looks blue, but is officially green, one is silver and the third is dark blue. Here is the very simple explana-tion The yellow paint would not stand the heat from the chimney. Special paint had to be selected and yellow was not amongst the available colours.

Clean Sweep for Elliott Rifles

THE Elliott Rifle Club dominated the Maidstone and District Shoulder to Shoulder League last series by a series and the Shoulder League last season by winning all the main awards in the League and Individual championships. This is 0.22 in rifle shooting on a 25yd, indoor range. The presentation ceremony at the Corn Exchange Rochester, on May 10,

as a triumphant occasion for the Elliott A and B teams, who respectively Divisions 1 and 2. Champion, Vivienne Beaver (MACD): Runner-Up, Christine Luck(AS&RD). Division 1 Individual Champion, M. J. Foreman (ADD); Division 2 Individual Champion, G. F. Burbidge (MACD): Runner-Up D. K. Babington-Browne (TACD); Division 1 Team Champions, Elliott A, H. Baker(AEID), R.S. Bloodworth (MACD), M. J. CAR PARK TURNS AIRFIELD

National Model Meeting Held

O^N June 16 the car park in front of Tower 1 was turned into an airfield for model aircraft. The occasion was the annual control line Bonanza held by the Elliott Engineer-ing Club for its 70 members and visitors from all over Britain. It was one of the main national events.

Given good weather, the Bonanza is always a success as Rochester pro-vides exceptional facilities for both competitors and spectators. The car park in front of the main tower block forms an ideal surface for the take-off and landing of model aircraft. The adjoining field, borrowed for the occasion from the Medway College of Technology, provides the addi-tional space required. The works canten produces tea and sandwiches throughout the day. Even the toilet facilities are much appreciated as most events like this are held in open fields

120 m.p.h. Speed

The Elliott Club, which is affiliated to the Society of Model Aeronautical Engineers, specialises mainly in control line aircraft, but there are a few model boat enthusiasts. A few prac-tise the rather more costly radio control technique. During the summer months Elliott

During the summer months Elliott club members give flying demonstra-tions at local fetes and have competed extremely successfully against other clubs. They produce their own newsletter "The Circuit", which is sent to clubs all over Britain. In return the Elliott club receives the other clubs' newsletters. On Sunday mornings they exercise their 120 m.p.h. control line models outside the fuel flow laboratory.

Poetic Justice

The shocking picture of "Royal Air Force Rochester" in last EFA News has produced this poetic protest from ATED, referring in the first verse to the twins born to the wife of the RAF detachment commander, FIt Lt Hitchins.

This Royal Air Force takeover's shocked ATE The name of the Company is CSDE I've heard of the Chairman, I'm sure he's the lad, A bit of a twicer, for twins he's just had.

The rest of the board seem an oddlooking crew They are known by long numbers and all dress in blue The Company is limited but there's no lack of power To be able to advertise 'side of our tower.

The initials we wondered, for what do they stand They sound quite impressive, you'd almost say grand. However we found that we need have no fears From the Crazy Society of Drunk Engineers.

Perhaps Ken Brewster was right

Despite the impolite hint to Ken Brewster in last EFA News that beer Brewster in last EFA News that beer was not the only drink in the World, the "end of party season" party— what better excuse?—organised by him and Dave Jones (MACD) at Lansdowne Court on May 4 might have given Fremlin's shares a boost. An all-time record 67 gallons of three-star bitter wert down the barch and star bitter went down the hatch, and many more than the 75 guests invited turned up.

It was one of those evenings for the beer enthusiast and more than £90 worth of alcohol was consumed, to the merriment of all concerned.

Several two-man teams from the club went to Yeovilton at Whitsun to compete in the FAI national control line racing championships.

ANY retired Elliott employee over 65 years old is eligible to join the Over 65 club with his or her wife or husband.

Summer for

the Over 65's

There are 66 members at present and they arrange outings and social even-ings during the summer months. Most ings during the summer months. Most of the outlings are to popular sea-side resorts or to local beauty spots, and very often they include lunch or tea en route. Most of the cost is borne by the Elliott Social Club.

At the social evenings, held once a month at Elliott clubhouse, members spend the first half an hour discussing spend the first hait an hour discussing club matters, but the rest of the time is their own to really enjoy themselves. On June 6 the Over 65s arranged a day tour of the Thames Valley, stopping at Reading for lunch. Already planned are a trip to Eastbourne on July 25, with tea at Wannock Gardens, and a trip to Bognor Regis on September 5.

better than ever, a great afternoon for the children.

against East Malling Research Station Archery Club, and Elliott Archers won by 727 points. On April 14, EAC were at home to Lamorbey Park Archery Club from Sidcup. Lamorbey Park won by 40 points in the pure score result, but in

the handicap result, Elliotts won by

574 points

County team preparation for the Kent County te contests. (Picture by Gay Lancaster.)

NE of the advantages of membership of the English Electric Group became 0 O apparent on May 9 and 10 when a mobile exhibition of EE domestic equip-ment visited the Rochester establishment. All the latest English Electric and Revo cookers, washing machines and refrigerators were demonstrated by Mr E. O. C. Pass, EE Staff Sales Manager.

The point is that Elliott employees, as members of the group, can buy this equip-ment at sizeable discount. The various models are listed on company notice boards. To buy one, contact social secretary Jim Collins.

O^N returning to the UK, Reg Wofford, General Electric's Wofford, General Electric's field representative, brought with him this picture of GE's factory in New York. Reg, you may edition of EFA News being presented with a bowler hat to accompany him on his short return visit to the States. He took some pictures of Elliott's Rochester establishment back with him to give GE's personnel some idea Rochester establishment back with him to give GE's personnel some idea of working conditions at Elliotts. This view of Phantom autopilot pro-duction in GE's factory shows a marked similarity to Elliott's Rochester establishment. Reg com-mented that Rochester had far better dwilight working conditions. He daylight working conditions. He added that GE's lighting is good, but unfortunately all artificial. It is notable that protective glasses are worn by all the GE employees, Even people visiting the assembly line must wear them. Glasses are avail-able to Elliott personnel, but few people wear them

ded by swimming club committee members and fa s Ted Crisp with his watch at the poo

Swimming for Fun Ted Crisp Makes it Full Time

PLEASANT surprise awaited Ted Crisp (Fisher) on May 29, when he went to Buckmore Park for his usual weekly swim with Elliott Swimming Club.

Jim Collins, Chairman of Elliott Swimming Club, presented Ted with a watch, a gift from the other members of the club. The presentation came as a complete surprise and was in recognition of his retirement from Elliotts in July and in appreciation for all the work he has done for the club over the past years.

Ted has been active in the club for many years. At the annual general meeting last April, he was made an honorary member when he resigned as club treasurer after five years. When he retires from Elliotts on July 8, he will become voluntary super-intendent of Buckmore Park Swimming Pool. His main task will be to maintain the pool and general swim-ming club facilities. He has already spent much of his spare time volun-tarily renovating the pool.

Heated Pool

Members of Elliott Swimming Club spend an hour and a half every Wednesday evening in the Buckmore Park Swimming Pool. They don't train for competitions because over the past 10 years it has been found that the past 10 years it has been found that they prefer simple family swimming sessions. Members are entitled to bring one other adult and any children with them, provided the guests pay the standard rate of

admission. With the water temperature kept at a constant $72^{\circ}-75^{\circ}F$, and with warm air heating, swimming is enjoyable all the year round, although in winter the number of active members drops considerably.

Ted Crisp intends to continue in the Elliott Swimming Club activities and to keep close contact with the many friends he has made through the club

Defeat 14 men of varying experience in succession. That was the challenge Sid Alderman, of Sheet Metal Press Shop, had to face recently in order to become a Second Dan in Judo. Before fighting, Sid had to give a practical demonstration on First Aid and resuscitation. It then took him about an hour to fight the line-up consisting of two First Dans (Black Belts), five Brown Belts, five Blue Belts and two Green Belts. Sid has been a First Dan for two-and-a-half years, another necessary require-ment for entering the competition. In recognition of his new grade he now has two red hags on his Filack Belt. Belt.

now has two red Jags on his Black Belt. The fights took place at the Southern Area Grading Competition held at the Maidstone YMCA centre on May 12. Mr O-Tani from Japan, a Seventh Dan, represented the Koda-kan Society, the governing body of Judo. He was there to referce and grade the fights and to ensure that the Society standards were maintained. Nine competitors from all over southern England entered the com-petition, but only two, including Sid, reached the required standard. They each receive a certificate from the Kodakan Society after their results are registered in Japan. Sid is a member of the Elliott Judo Club, but has been a member of the Kent County Judo team for the past three years. He fights with a seven-man team against other County clubs.

Mr John Stonehouxe, Minister of State for Aviation, visited the EFA stand at the Hanover air show in Germany in April/May. Here he is, third from right, listening to Rom Mosley (ACD) on the right, explaining the airborn digital navigation system and \$20M computer. Standing between them is EFA team leader. Fred Huskett. On the left is George Rands (IND). Also on duty were Ron Lowry (ADD) and Jim Dear (AED). The newly granted Queen's Award to EFA was prominently displayed. (Picture by Fox Photon Lid.)
