## SUPPORT

EXPERTISE in the fields of airframe, engine, systems, avionics and publications is ready to fulfil your requirements. From our extensive experience on F27, B737 and B727 we now provide technical support for a number of customers' aircraft, engines and avionics packages. In most cases we are responsible for assessing and maintaining the modification status of these customer items and we have an established and effective system for doing so.

Technical Services, upon request, administers full control over customer equipment specifications or will respond to your specific requests.

Our Publications section currently provide full documentation support for more than 30 aircraft of the above types.

AIR NEW ZEALAND — Christchurch Base. For all your technical and publications support requirements.

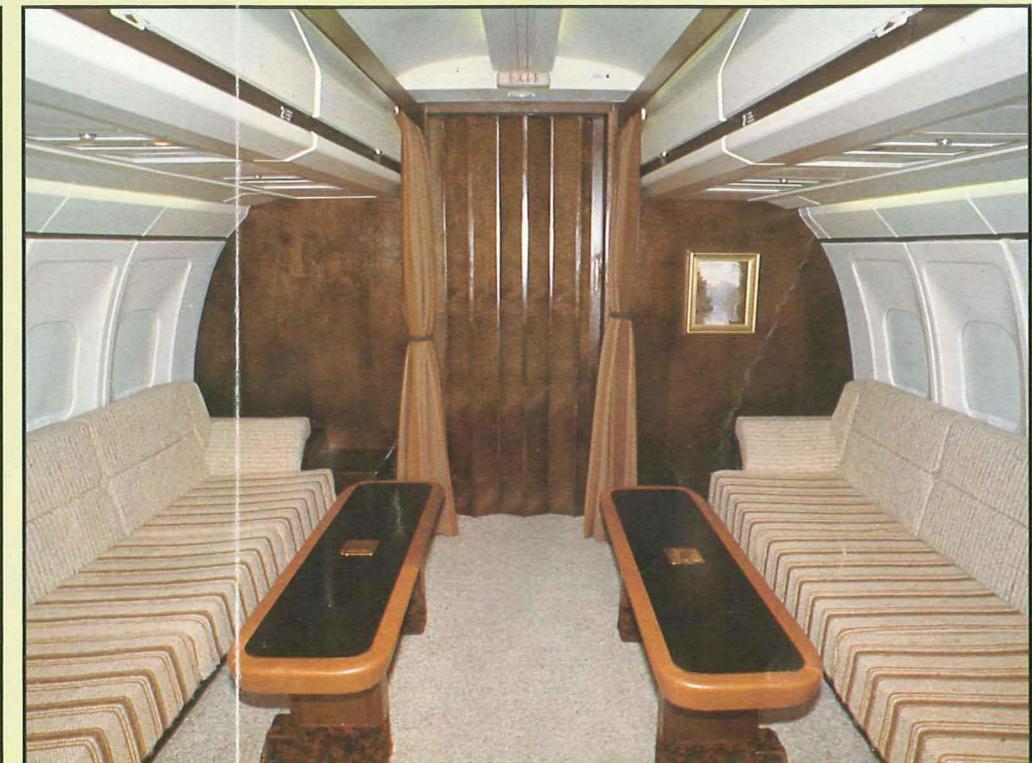

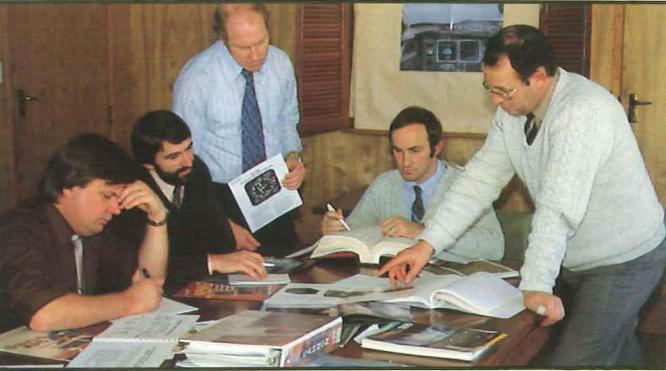

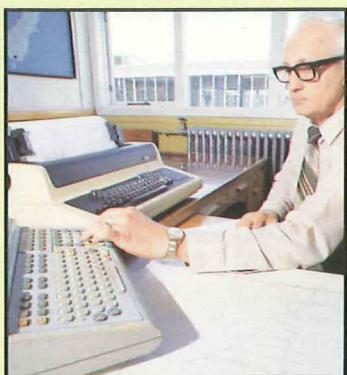

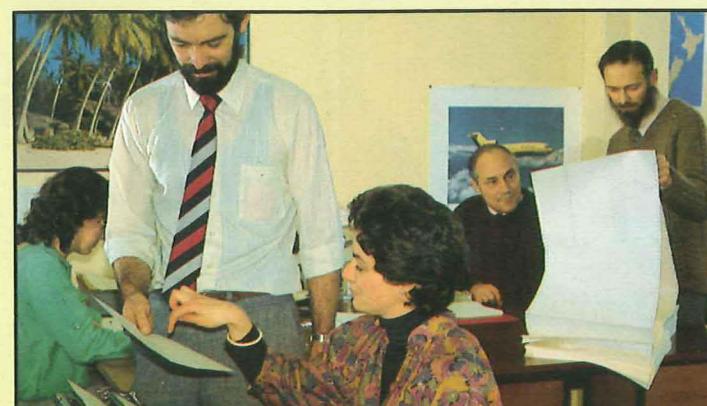

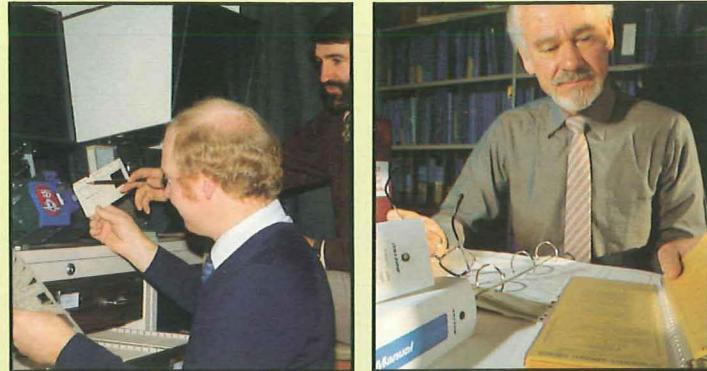

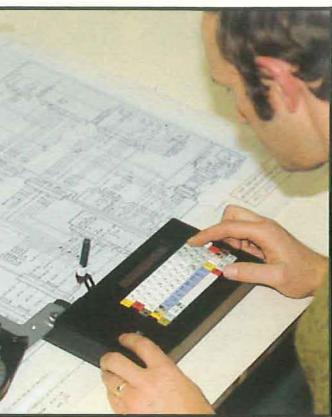

## MODIFICATION

MODIFY ... to get exactly what you want. Economically.

Experience is the key. We design, manufacture and install a range of items from standard airline cabin equipment, including galleys, to specialised scientific installations — for example: meteorological cloud-sampling pylon mounting. From individual modifications to complete aircraft refurbishments with full New Zealand Civil Aviation Design Approval. We have wide experience in component manufacture as well.

Manual amendments to reflect your modification are all part of the service. Whether it be airframe, engine, avionics, systems or documentation support, our capable and experienced people and well equipped office ensure efficient and timely production.

AIR NEW ZEALAND — Christchurch Base. Most experienced MODIFICATION AND SUPPORT CENTRE in South East Asia and Australasia.

# CUSTOM MODIFIED

... to Customer specification.

These aircraft are equipped with our modification packages and are in daily service in both civil and military applications.

These packages are gaining an enviable reputation for their design, performance and economy.

Contact us for your modification requirements.
